

Essentials for winter fun

'Tis the Season for some holiday cheer!

Here are some tips to help you be merry and safe through the holiday season -

Decorate with durable holiday decorations – these are resistant to the elements and can keep holiday landscapes festive throughout the season

Put up some LED lights – not only do they stay brightly illuminated and sparkle but they can withstand harsh weather

Find a snowy hill and go sledding or tubing – wear your helmets and goggles to protect yourself!

Make a bonfire – cozy up by the fire and pack your favorite food supplies in reusable plastic food containers

Beat the winter glare – wear your protective sunglasses and dab on some SPF

BPA is a building-block chemical used to make polycarbonate plastic. Thanks to BPA and polycarbonate plastic, these commonly used products are **strong, durable, clear, shatter-resistant** and **light weight!**

IS BPA SAFE?

FDA's Assessment Says Yes.

BPA is one of the most widely studied chemicals used today. The FDA recently released the CLARITY Core Study, confirming that BPA is safe at the very low level consumers are exposed to. Government agencies around the world agree.
