

Enjoy the **SUN** with Confidence!

FUN IDEAS TO STAY **ACTIVE AND SAFE** THIS SUMMER

Pack your bags and explore a new city

Grab cold drinks and a cooler for a relaxing picnic at the park

Simply soak up some sun

Sit on your front porch to watch the sunset

Hop on your bike or grab your scooter – just don't forget to wear your helmet

Light up the backyard and host an evening barbecue

BPA is a building-block chemical used to make polycarbonate plastic. Thanks to BPA and polycarbonate plastic, these commonly used products are **strong, durable, clear, shatter-resistant** and **lightweight!**

IS BPA SAFE?

FDA Says Yes.

BPA is one of the most widely studied chemicals used today. FDA conducted the CLARITY Core Study, which confirmed that BPA is safe at the very low levels consumers are exposed to. Government agencies around the world agree.
